Contents of Volume 28

No. 1

Announcement v

Research Papers

D.J. Gaertner, R.O. Jacoby, E.A. Johnson, F.X. Paturzo, A.L. Smith and J.L. Brandsma (USA)
Characterization of acute rat parvovirus infection by in situ hybridization 1

A.K. Williams, L. Wang, L.W. Sneed and E.W. Collisson (USA)
Analysis of a hypervariable region in the 3′ non-coding end of the infectious bronchitis virus genome 19

Y. Stram, I. Sela, O. Edelbaum, E. Tanne, M. Karchi and H. Karchi (Israel)
Expression and assembly of the potato virus Y (PVY) coat protein (CP) in *Escherichia coli* cells 29

X. Xu, E.P. Rocha, H.L. Regenery, A.P. Kendal and N.J. Cox (USA)
Genetic and antigenic analyses of influenza A (H1N1) viruses, 1986–1991 37

C.J. Funk and R.A. Consigli (USA)
Temporal expression and immunogold localization of *Plodia interpunctella* granulosis virus structural proteins 57

S.K. Mittal, M.R. McDermott, D.C. Johnson, L. Prevec and F.L. Graham (Canada)
Monitoring foreign gene expression by a human adenovirus-based vector using the firefly luciferase gene as a reporter 67

Related Elsevier titles contents alert 91

No. 2

Announcement iii

Research Papers

M.E. Piccone, A. Fernandez-Sesma and P. Palese (USA)
Mutational analysis of the influenza virus vRNA promoter 99

Z. Ge, C. Hiruki and K.L. Roy (Canada)
Nucleotide sequence of sweet clover necrotic mosaic dianthovirus RNA-1 113

D.C. Bloom, R. Stern, M. Duke, D. Smith and R.W. Moyer (USA)
A revised *Hin*dIII map and sequence analysis of a large 'left-hand' non-essential region of the rabbit poxvirus genome 125

D.K.S. Goh (USA)
Identification and immunocharacterization of a 25K structural protein in *Autographa californica* nuclear polyhedrosis virus (AcMNPV) 141

J. Schorr and W. Doerfler (Germany)
Non-homologous recombination between adenovirus and AcNPV DNA fragments in cell-free extracts from insect *Spodoptera frugiperda* nuclei 153

D.S. Turner and S.N. Covey (UK)
Reverse transcription products generated by defective plus-strand synthesis during cauliflower mosaic virus replication 171

G. Morace, G. Pisani, F. Beneduce, M. Divizia and A. Panà (Italy)
Mutations in the 3A genomic region of two cytopathic strains of hepatitis A virus isolated in Italy 187

N.D. Christensen and J.W. Kreider (USA)
Monoclonal antibody neutralization of BPV-1 195

M. Yu, K.A. McColl and A.R. Gould (Australia)
Cloning and nucleotide sequence determination of the major envelope glycöprotein (gp55) gene of hog cholera virus (Weybridge) 203

Related Elsevier titles contents alert 209

No. 3

Research Papers

R. Gilbert and H.P. Ghosh (Canada)
Immunoelectron microscopic localization of herpes simplex virus glycoprotein gB in the nuclear envelope of infected cells 217

S.-L. Bi, M.A. Purdy, K.A. McCaustland, H.S. Margolis and D.W. Bradley (USA)
The sequence of hepatitis E virus isolated directly from a single source during an outbreak in China 233

J.M. Rojas, J. Dopazo, E. Martín-Blanco, C. López-Galíndez and E. Tabarés (Spain)
Analysis of genetic variability of populations of herpes simplex viruses 249

L. Oxburgh, M. Berg, B. Klingeborn, E. Emmoth and T. Linné (Sweden)
Equine influenza virus from the 1991 Swedish epizootic shows major genetic and antigenic divergence from the prototype virus 263

S.N. Shchelkunov, O.I. Ryazankina and P.V. Gashnikov (Russia)
The gene encoding the late nonstructural 36K protein of vaccinia virus is essential for virus reproduction 273

S.R. Roberts and J.R.S. Manning (USA)
The major envelope glycoprotein of the extracellular virion of *Autographa californica* nuclear polyhedrosis virus possesses at least three distinct neutralizing epitopes 285

313

N. Mizukoshi, K. Sakamoto, A. Iwata, T. Tsuchiya, S. Ueda, B. Apiwatnakorn, M. Kamada and A. Fukusho (Japan, Thailand)
The complete nucleotide sequence of African horsesickness virus serotype 4 (vaccine strain) segment 4, which encodes the minor core protein VP4 299
